SKILLS

- Languages:** Java, C, C++ (Basic) , Python , MySQL
- Technologies:** HTML, CSS, Bootstrap, Node.js, React, Tailwind CSS, Express.js
- Databases/Tools:** MySQL, MongoDB, Git, GitHub, Figma, Cloudinary , VS Code, Canva, Jupyter Notebook
- Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

Phone-Controlled Laptop Unlock | [GitHub](#)

Dec 2025 - Jan 2026

- Architected a secure phone-to-laptop authentication system enabling users to remotely unlock their laptop through a trusted mobile device.**
- Engineered device-to-device communication** for exchanging authentication requests between the smartphone and laptop with minimal user interaction.
- Designed an automated lock/unlock workflow** with device verification, connection handling, and failure-state management for reliable access control.
- Implemented multi-layer authentication and authorization**, ensuring only registered and trusted devices can initiate laptop unlock requests.
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, WebRTC, Tailwind CSS

Sakuri App| [GitHub](#)

Mar 2026 - May 2026

- Developed Sakuri as a centralized application platform**, combining an intuitive user interface with structured backend services for seamless user interaction.
- Engineered a responsive application workflow** for managing user data, application features and real-time interactions through a modular architecture.
- Implemented persistent data management** using a structured database layer to securely store and retrieve application information.
- Designed a clean, user-focused interface** emphasizing intuitive navigation, responsive layouts and a consistent visual experience across the application.
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Clerk API, Stripe API

Movie & Web-Series Recommendation System — AI/ML| [GitHub](#)

Feb 2026 - Mar 2026

- Developed an AI/ML-based recommendation system** that analyzes movie and web-series attributes to generate personalized content recommendations.
- Engineered a content-similarity pipeline** using movie metadata to identify relationships between titles and recommend relevant content.
- Implemented feature extraction and similarity scoring** to rank titles based on characteristics such as genre, cast, keywords and storyline.
- Designed an interactive recommendation interface** allowing users to discover similar movies and web series based on their selected titles.
- Tech Stack:** PHP, MySQL, HTML, CSS, JavaScript, WebSocket using Ratchet

TRAINING

Lovely Professional University | [Certificate](#)

Jun 2025 - Jul 2025

CERTIFICATES

- Master Generative AI and Generative AI Tools including ChatGPT | [Udemy](#) Aug 2025
- The Bits and Bytes of Computer Networking | [Coursera](#) Sep 2025
- Software Development Processes and Methodologies | [Coursera](#) May 2026

ACHIEVEMENTS

- Solved more than **200** programming problems on online coding platforms during regular practice and learning.
- Achieved the **LeetCode 100 Days** Badge by maintaining consistent daily problem solving over time.
- Ranked **Top 25 among 50+ teams** in a college hackathon with an innovative web solution prototype.

EDUCATION

- Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.03** Aug 2026 - Present
- Army Public School** Darjeeling, West Bengal
Higher Secondary Education; **Percentage: 87.1%** May 2021 - Mar 2023
- Army Public SchoolSchool** Darjeeling ,WestBengal
Secondary Education; **Percentage: 92.7%** Jun 2020 - Mar 2021
